

# Health & Safety Highlights

## FRESH START

During the month of January, The SHOPPE closed its doors to help stop the spread of the coronavirus. In NC, people testing positive for the coronavirus was at an all-time high. In order to keep participants and staff safe, the decision was made to stay home and stay safe. By acting quickly and appropriately, the agency was able to prevent a coronavirus outbreak and re-open its doors in February.

## BBP

The three most common blood borne pathogens (BBPs) are human immunodeficiency virus (HIV), hepatitis B virus (HBV), and hepatitis C virus (HCV). Only one of these viruses has a vaccine to protect against it. Do you know which one it is? If you are not sure of the answer, it can be found by watching this video on BBPs by the American Heart Association.

## MARCH TO SAFETY

In the month of March, we reviewed the agency's evacuation procedures. At some point in time, it may be necessary to flee the building in the event of a power failure, medical, or violent emergency. Everyone should know how to quickly evacuate using the safest exit. To aid in the process, evacuation routes are posted in each room of the facility. Can you find the nearest exit from where you are?

## EVACUATING TO SAFETY

## Community Vaccination Center to open in NC

The vaccination center will open at Four Seasons Town Centre in Greensboro on March 10 and will remain open for 8 weeks. It will operate 7 days a week with options of drive-thru service in the parking lot and walk-in service inside the mall.

### THANK YOU FOR KEEPING US SAFE

We know things have been challenging during this coronavirus pandemic. Thank you to all the people we support and MSS employees for thinking of others by wearing your masks, routinely washing your hands, and social distancing as best as possible. We are actively reducing the spread of the coronavirus! Please stop by the HSCO's office and pick up a free cloth mask!

### OUR COMMITMENT

Morgan Support Services is committed to providing an environment in which our commitment to health and safety is evidenced through the physical environment, human interactions, activities and events, ongoing training, and outcomes in all services and settings.
